2 Mission and Vision

The Independent Society of Knowledge is a decentralized, collaborative, open institute for research and education. Our mission is to achieve a decentralized academia, where anyone around the globe can contribute to researches, and projects.

► **Core Values** The core values surrounding ISK is, decentralization, open-access and collaboration. We vision an environment where scientists and researchers can freely share their work, ideas, and findings. Through development of platforms that would help them collaborate at ease, isk provides systems made for today needs of scientific society.

► **Target Audience** ISK products are to mainly benefit ones within the criteria of science and mathematics. This is people who are active researchers, or students getting educated in academia. Although the main audience are people of science, because of the values we hold, any-one can collaborate with us on the projects.
